Team Members	Femima Shelly. A. T Abisha. G Benitta. R.K Delfin. D

Step 1 :

      Go to the official Docker website

URL: https://docs.docker.com/desktop/install/windows-install/

Step 2 :

      Click the **Docker Desktop for Windows** button to download. It will take a few seconds to download completely in your windows.
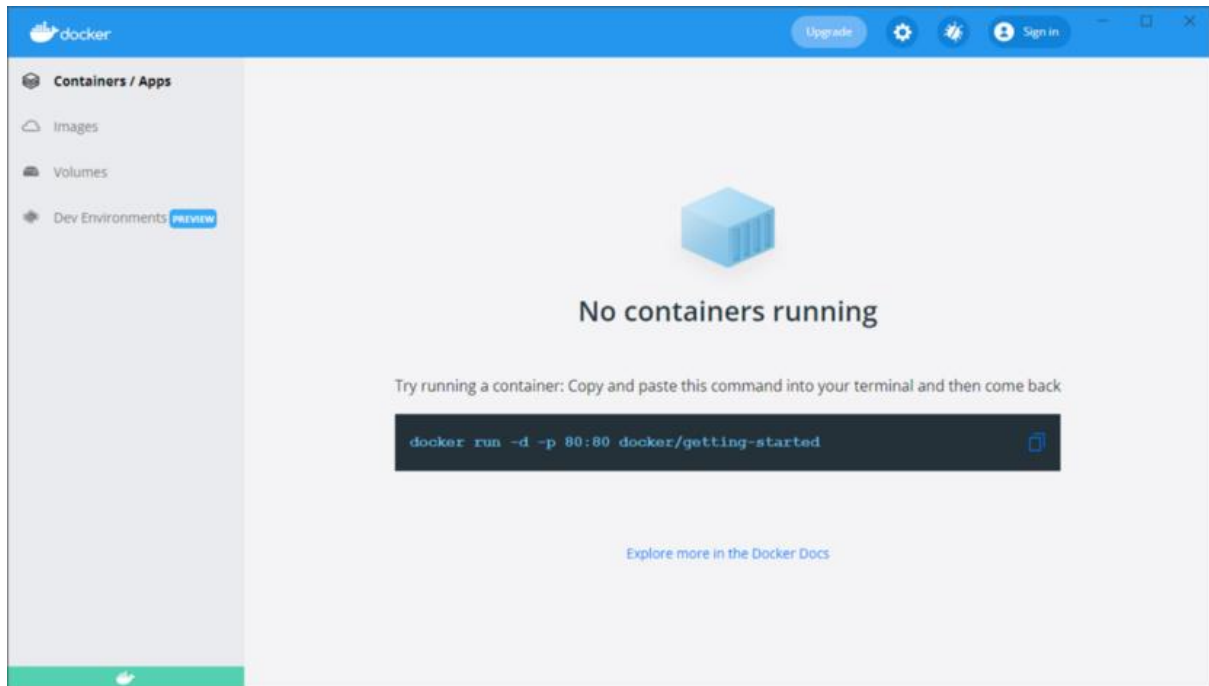

Step 3:

      Double-click **Docker Desktop Installer.exe** to run the installer. When prompted, ensure the **Use WSL 2 instead of Hyper-V** option on the Configuration page is selected or not depending on your choice of backend.

Step 3 :

        Follow the instructions on the installation wizard to authorize the installer and proceed with the install.

        When the installation is successful, click **Close** to complete the installation process.

Step 4 :

        Finally the docker desktop is installed successfully
